Dunkerque-Port offers two sites for offshore wind-power

Following the call for tenders issued by the Minister for Energy on 12 July 2011 for offshore wind-power plants in mainland France, Dunkerque-Port is offering two sites for the installation of component production factories (platforms, blades, masts, foundations, etc) and the related logistics.

The first site offers an area of approximately 30 ha for the production side, linked by a heavy goods track to a logistics area of 8 ha near an existing quay. The second site, after development, would provide some 60 ha giving access to maritime quay to be built.
