DISCOVERING BIODIVERSITY VISIT THE PORT DISTRICT!

As a finale to European Sustainable Development Week which runs from Monday 30 May to Friday 5 June 2015, Dunkerque-Port is giving a guided tour of its district on Saturday 6 June 2015, from 10.00 to 12.00.

Visitors of all ages are welcome to join this two-hour tour around the port district, which will be an opportunity to discover or rediscover the Port of Dunkirk in its many facets.

Besides the industrial aspect of the harbour area, the protection of biodiversity, industrial ecology, climate change and waste management are all major concerns for Dunkerque-Port. This visit will give a glimpse of the concrete action taken to support sustainable development at the scale of a Major Sea Port.

An officer of the port will accompany the participants, taking you to sites you probably never knew were there.

There's lots to discover – don't miss it!

France's third-ranking port, Dunkirk is well known as a port handling heavy bulk cargoes for its numerous industrial installations. It has also built its reputation in other sectors such as cross-Channel RORO traffic to Great Britain, containers, fruit, etc. Classified as the ninth port of the North Europe Range which extends from Le Havre to Hamburg, Dunkirk is also the leading French port for ore and coal imports, France's leading port for containerised fruit imports, and the country's second-ranking port for trade with Great Britain.
